

There is as much difference between a jack and a jack as there is between a caboose and a coach

The New Acme is the strongest, most powerful, safest, quickest acting, lightest, simplest, most reliable and cheapest high-duty short-lift Jack for Railroad and Shop use.

The new No. 40, 10-inch, 20-ton capacity
ACME BALL-BEARING JACK

The New Acme will accomplish equal work with half the labor, in about half the time, with nearly half the weight, at almost half the price.

If you are interested in a jack that jacks—a new jack—the best jack made—we will be pleased to send you "OUR book on Jacks for Jack Users" to prove what the NEW Acme can do.
